

github.com/xiscoooo

ENGINEERING student in Data Science at TÉLÉCOM PARIS (*Institut Polytechnique de Paris*). Co-founder and CEO of *Saména* — a B2B SaaS startup building zero-hallucination document intelligence for consulting firms, incubated at Télécom Paris under Prof. Fabian Suchanek. Working at the intersection of applied research, product, and go-to-market.

Lycée Saliège — two-year intensive programme in mathematics, physics and engineering sciences preparing for French *Grandes Écoles* entrance examinations.

Quantitative and qualitative scoring of agritech startups for the Télécom Paris incubator. Independent mathematics tutor in parallel — currently mentoring ten students from *lycée* to *classes préparatoires*.

Stochastic modelling of the Vélib' bike-sharing network — closed CTMC migration process (25 colonies, product-form stationary distribution, Gillespie simulation). Beamer report & oral defence.

Python, FastAPI, Pandas, NumPy, scikit-learn · JS,
Java, C, SQL · L^AT_EX · Git, Linux.

Twelve years of competitive swimming · lifeguard certified (BNSSA) · literature · French driving license.
